

博自然资(用地)挂字[2024]30号用地红线图

This figure is a topographic map of a specific area, likely used for land surveying or property mapping. The map features a grid system with horizontal and vertical lines representing property boundaries and roads. Contour lines are drawn across the map to indicate elevation changes. A prominent red line, representing a survey boundary or path, is overlaid on the map, connecting several points marked with circles. Each point on this red line has a unique coordinate pair assigned to it, such as X: 2561688.118, Y: 38494484.788. The map also includes a compass rose indicating North direction. On the right side, there is a large red circular stamp with Chinese characters, which appears to be a seal or a mark from a surveying authority. The overall layout is technical and precise, designed for professional use in real estate or engineering contexts.
